

WILLIS LEASE FINANCE CORPORATION
Job Description

Job Title Microsoft Power Platform / SharePoint Developer

Department Information Technology

Location Remote – based in Coconut Creek, FL, USA

Summary

The Microsoft Power Platform / SharePoint Developer, in collaboration with the Director, Applications and Development, creates, develops and maintains applications and solutions built on the Power Platform: Power Apps, Power Virtual Agents, Power Automate, Power BI as well as SharePoint, AI and future technologies. This position will work with cross-functional teams across departments, and global business units, within the organization to understand their requirements to identify, design, plan, develop, test, debug, document, train, maintain, and support tools that will enable the business.

The role will require the ability to manage multiple priorities, daily tasks and projects, while working closely with other team members. It requires a person that can remain flexible and can effectively collaborate across cross-functional teams and global business units. This position requires excellent communication skills and the ability to work with diplomacy and positive attitude. Responsibilities will also include, but are not limited to, the following:

Responsibilities

This position is responsible for:

- Building and configuring Power Apps, automatic process workflows with Power Automate and necessary connectors
- Governance and implementation of the Power Platform tools and SharePoint
- Communicate highly technical information to both technical and non-technical personnel
- Develop, maintain, and continually improve relationships/partnerships with customers, stakeholders, peers, partners, teammates, and vendors/suppliers
- Respond to help desk tickets, telephone calls, email and personal requests for technical support in timely manner including feedback and closure
- Perform knowledge transfers among team members by preparing and maintaining documentation for processes, procedures, written instructions, and solutions to problems
- Collaborate with team members to identify, recommend, plan, develop and implement technology
- Maintain knowledge of developments in relevant technologies and their use in the industry, making recommendations when appropriate

WILLIS LEASE FINANCE CORPORATION
