

Job Title: Records Project Manager – Engine Acquisitions

Department: Technical Services

FLSA Status: Exempt

Location: Coconut Creek, FL or Bridgend, Wales

Summary:

The Records Project Manager – Engine Acquisitions will be responsible for the pre-purchase inspection and review of used engines to ensure they meet the required standards of documentation, build and performance to allow integration into the Company fleet. This position will occasionally require the Records Project Manager to travel to the location of the engine and/or the records to manage the acquisition.

Responsibilities:

- Manage the technical component of used engine acquisition projects.
- Review engine technical documentation and records to determine if acceptable to pursue as potential purchase candidates.
- Build technical records packages and engine data in WLFC software systems.
- Other duties as assigned.

Requirements:

- Mandatory 15 years experience in the field of large commercial aero engine maintenance and engineering.
- The position requires a strong background in engine records to include Airworthiness Limitations, Airworthiness Directives and maintenance & inspection programs in addition to significant knowledge of aero engine performance, reliability and build standard.
- Experience with a minimum of three of the following engine models: CF34, CFM56, CF6-80, PW4000 and V2500.
- Knowledge of FAA and EASA Aviation Regulations required.
- FAA A & P or equivalent certificate or license.
- Managerial, organizational and planning skills.

-
- Strong interpersonal skills including the ability to work well with contractors and customers.
 - Ability to manage multiple tasks.
 - Proficiency in Microsoft Word, Excel and Nuance required.
 - Able to travel on short notice.
 - Knowledge of foreign languages a plus.

Travel:
